## **Brief Program Description**

Just starting out? Been playing for awhile but ready to advance? From the Blues to Rock, and everything in between...Rock Academy of San Diego workshops and lessons are designed for getting you to play quickly!

My main objective is providing practical lessons and exposing the students to the fun, creativity, and power of music. My underlying message is all about the importance of commitment, tenacity, and priorities in realizing their dreams. In addition to practical lessons I will incorporate music and instrument history, teach how music affects our everyday lives, and help the students foster a true sense of accomplishment and self esteem.

For full program details and information, please visit <http://www.facebook.com/rockacademysandiego>
